

Hamburg, Germany: Solidarity with prisoners, attacks on prison profiteers and Italian consulate

In Hamburg the police reported attacks on the Italian consulate and offices and cars of the prison profiteers „chubb“ and „SPIE“. Last week, paint was thrown at the Italian consulate.

During the same week, the offices of SPIE were attacked with paint and stones. SPIE is involved in the construction of prisons, nuclear plants and other dirty business for years already.

Also this week, a car of CHUBB was put to flames. CHUBB is responsible for security architecture in Hamburg prisons. On the Schanzenfest, a rebellious neighbourhood-street-festival, money for prisoners was raised and a big banner in solidarity with Juan was put over the street. Even though it was a rainy day, a lot of people showed up, took the streets, bands played shows and information was spread. After the fest there was a wild demo for people facing repression because of struggles against fascism and power.

The banner says “The struggle against state and fascism is international! Solidarity with the anarchist Juan, incarcerated by the Italian state because of attacks onto the fascist Lega Nord. Freedom for all prisoners!”
